Supplementary Material for “Seasonal prediction and predictability of regional Antarctic sea ice”

Figure S1: As in Figure 5, but for non-detrended time series.
S2 Regional Prediction Skill: MSSS

Figure S2: As in Figure 6, but for non-detrended time series.
Figure S3: As in Figure 6, but for squared detrended ACC values.
Figure S4: As in Figure 6, but for time series that have been mean-biased corrected by an additive correction, but have not been linear regression adjusted.
Figure S5: As in Figure 11, but for SPEAR_LO.
Figure S6: Climatological JAS sea ice drift patterns from the experiments that produce sea ice ICs in (b) FLOR, (c) SPEAR-lo, and (d) SPEAR-med compared with (a) observed drift from OSISAF. Observed and predicted JAS SIC (%) is plotted in colors.
